

Facility Capabilities - Wright Road

Safety, Quality and Efficiency is Our Goal

Fisher Energy's main fabrication facility is located in northwest Houston, Texas, USA. The facility is specifically configured for vertical pump manufacturing and testing, pump systems configuration and testing, machining, and fabrication, including piping, code vessels, and process systems.

- 5 acres
- 8,000 square feet of office space
- 25,000 square feet of shop space
- 15T, 10T, 5T, 5T overhead cranes
- Multi-axis CNC machining / manual lathes & mills
- 40 foot automated plasma cutting table
- 60,000 gallon main test reservoir
- 5,000 gallon vacuum test reservoir
- Computerized test data acquisition
- Test electric power for 1200 hp (750 kW)
- Hydrostatic testing to 10,000 psi
- Robust quality management system, including:
 - API
 - FM / UL
 - ASME (Sect VII, B31), CRN, PED

FISHERPUMP™ Multi-Stage Centrifugal Pumps

FACILITY CAPABILITIES - WRIGHT ROAD (HOUSTON, TEXAS)

CNC Machining Capabilities

Plasma Table – 10' x 40'

Okuma Lathe – 15" dia x 24" long

Mori Seiki – SL7 Lathe – 24" x 4" long

Mori Seiki – TL40Y Turning Center
18" diameter x 10' long, Live Tooling, Y axis

Manual Machining Capabilities

Radial drill press
16" column x 6' arm

Mazak lathe – 24" dia. x 10" long
Mazak lathe – 24" dia. x 10" long

Bridgeport mill
12" width x 5' length
