

February 3, 2020
For Immediate Release

Houston-based energy equipment and services provider Fisher Energy announces today that it is acquiring the assets of Dynamic Power Systems & Controls, a premier supplier of electrical and control systems to the marine and oil & gas industries.

Dave Martin, President of Fisher Energy, states “We are excited to welcome the Dynamic team to Fisher Energy and are particularly pleased to offer the products and services that Dynamic has been well known for in the market to our customers and partners.”

Doug Keith, President of Dynamic, adds “We want to thank our great team and customers for putting us in this position to join forces with Fisher to allow for a more rapid growth and integration with the products and services offered by Fisher. We are looking forward to continuing to develop the Dynamic brand, products, and services in our current markets, as well as in new markets.”

The Dynamic team will relocate to the Fisher headquarters facility over the coming months, and integrate Dynamic’s engineering, project management, fabrication, and services operations into Fisher’s operations.

Fisher Energy leads the industry in the application, design, manufacturing, testing, and servicing of its Multi-Stage Centrifugal Pumps, Firewater Pump Systems, Fluid Pump Systems, and Fluid Process Systems for the Oil & Gas Production, Midstream, Refining, Chemical, and Power markets across the globe. From deepwater offshore platforms to remote pipelines, the team at Fisher is ready to provide solutions worldwide.
